

Product Requirements Document (PRD)

Book Reading Log — For Book Lovers

1. Overview

A personal book tracking web application for book lovers to manage their reading journey. Users can catalog books, track reading progress, organize by genres and tags, view personal statistics, and import/export their library.

Target Users: Avid readers who want to track their reading habit digitally. **Platform:** Web application (responsive desktop + mobile).

2. User Stories

ID	Story	Priority
US-01	As a user, I want to sign up and log in with email and password so that my library is private and secure.	Must Have
US-02	As a user, I want to add a book with title, author, status, progress, genres, and tags so that I can start tracking it.	Must Have
US-03	As a user, I want to edit or delete a book so that I can keep my library accurate.	Must Have
US-04	As a user, I want to filter my library by reading status (reading / finished / dropped) so that I can focus on relevant books.	Must Have
US-05	As a user, I want to mark progress by percentage (0-100%) and by current page / total pages so that I can track exactly where I am.	Must Have
US-06	As a user, I want to assign multiple genres and tags to a book using a hybrid predefined + custom system so that I can organize flexibly.	Must Have

Table 1 – continued

ID	Story	Priority
US-07	As a user, I want to see a dashboard with reading statistics (books this year, currently reading, recently finished, total pages read) so that I can visualize my reading habit.	Must Have
US-08	As a user, I want to search across title, author, genre, and tag so that I can quickly find a book.	Must Have
US-09	As a user, I want to view a dedicated detail page for each book with full details, notes, and progress history so that I can review my journey with a book.	Must Have
US-10	As a user, I want to export my entire library to PDF or Word so that I can back up or share my reading list.	Should Have
US-11	As a user, I want to import my library from a PDF or Word file so that I can restore or migrate my data.	Should Have

3. Functional Requirements

3.1 Authentication

- **FR-AUTH-01:** Users can register with email and password.
- **FR-AUTH-02:** Users can log in with email and password.
- **FR-AUTH-03:** Passwords must be hashed before storage.
- **FR-AUTH-04:** Sessions must be secure and expire after inactivity.
- **FR-AUTH-05:** Users can log out.

3.2 Book Management (CRUD)

- **FR-BOOK-01:** Create a book with: title (required), author (required), status (default: reading), current page, total pages, progress percentage, genres, tags.
- **FR-BOOK-02:** Read — list all books for the authenticated user.
- **FR-BOOK-03:** Update any book field.
- **FR-BOOK-04:** Delete a book with confirmation.
- **FR-BOOK-05:** Progress percentage auto-calculates from `current_page / total_pages` when both are provided.
- **FR-BOOK-06:** If `total_pages` is not provided, progress can be set manually via percentage slider.
- **FR-BOOK-07:** Status options: `reading`, `finished`, `dropped`.

- **FR-BOOK-08:** When status is changed to **finished**, progress automatically sets to 100%.
- **FR-BOOK-09:** When status is changed to **dropped**, progress remains at last known value (user can override).

3.3 Genres & Tags

- **FR-GT-01:** Genres and tags support a hybrid model: predefined common options + ability to create custom ones.
- **FR-GT-02:** A book can have multiple genres (suggest 1–3, no hard limit).
- **FR-GT-03:** A book can have multiple tags (unlimited).
- **FR-GT-04:** Predefined genres include: Fiction, Non-Fiction, Sci-Fi, Fantasy, Mystery, Romance, Thriller, Biography, History, Self-Help, Science, Philosophy, Poetry, Classic, Contemporary.
- **FR-GT-05:** Predefined tags include: must-read, favorite, re-read, audiobook, ebook, paperback, hardcover, library, owned, wishlist, recommended.
- **FR-GT-06:** Custom genres/tags are stored per-user and available for future selection.

3.4 Dashboard

- **FR-DASH-01:** Display total books in library.
- **FR-DASH-02:** Display count of books currently reading.
- **FR-DASH-03:** Display count of books finished this year (by finished_at date).
- **FR-DASH-04:** Display count of books finished last year.
- **FR-DASH-05:** Display total pages read (sum of total_pages for all finished books + current_page for reading books).
- **FR-DASH-06:** Display recently finished books (last 5, with cover placeholder, title, author, finished date).
- **FR-DASH-07:** Display currently reading books with progress bar.

3.5 Search & Filter

- **FR-SF-01:** Global search bar searches across: book title, author name, genre names, tag names.
- **FR-SF-02:** Results update in real-time as user types (debounced 300ms).
- **FR-SF-03:** Filter by status: reading, finished, dropped (can show all).
- **FR-SF-04:** Filter by genre (single or multiple).
- **FR-SF-05:** Filter by tag (single or multiple).
- **FR-SF-06:** Filters can be combined (e.g., status=reading AND genre=Sci-Fi).
- **FR-SF-07:** Clear all filters button.

3.6 Book Detail Page

- **FR-DETAIL-01:** Show all book fields: title, author, status, progress bar, current/total pages, genres, tags.
- **FR-DETAIL-02:** Show “Notes” textarea — free-form text per book.
- **FR-DETAIL-03:** Show progress history log (timestamped entries: “Progress updated from 45% to 67% on 2026-05-19”).
- **FR-DETAIL-04:** Allow editing notes inline.
- **FR-DETAIL-05:** Allow quick progress update from detail page.
- **FR-DETAIL-06:** Back button to return to library list.

3.7 Import / Export

- **FR-IE-01:** Export entire library to PDF format — formatted table with all book data.
- **FR-IE-02:** Export entire library to Word (.docx) format.
- **FR-IE-03:** Import from PDF or Word — parse structured data and create books.
- **FR-IE-04:** Import must validate data and skip invalid rows with error reporting.
- **FR-IE-05:** Import must not duplicate existing books (match by title + author).

4. Non-Functional Requirements

ID	Requirement	Target
NFR-01	Performance —initial dashboard load	< 1 second
NFR-02	Performance —search/filter response	< 300ms
NFR-03	Security —password hashing	bcrypt / Argon2
NFR-04	Security —session management	HTTP-only cookies, CSRF protection
NFR-05	Availability	99.9% uptime
NFR-06	Responsive	Works on mobile, tablet, desktop
NFR-07	Accessibility	WCAG 2.1 AA compliance
NFR-08	Data isolation	Users can only see their own books

5. UI/UX Requirements

5.1 Design System

- Clean, minimal aesthetic with generous whitespace.
- Primary color: Deep indigo / slate blue (bookish feel).
- Secondary: Warm amber for accents (progress, highlights).
- Typography: Inter or Geist (sans-serif), readable sizes.
- Status colors: Reading = blue, Finished = green, Dropped = red/gray.

5.2 Page Structure

1. **Login / Register Page** — centered card, clean form.
2. **Dashboard (Home)** — stats cards at top, currently reading section, recently finished section.
3. **Library Page** — searchable, filterable grid/list of books.
4. **Book Detail Page** — full book view with notes and history.
5. **Add / Edit Book Modal or Page** — form with all fields.
6. **Settings Page** — account info, export/import buttons.

5.3 Interactions

- Toast notifications for success/error feedback.
- Confirm dialog for destructive actions (delete).

- Skeleton loaders for data fetching.
 - Smooth transitions between pages.
-

6. Acceptance Criteria

AC-01: Book Creation

Given a logged-in user on the “Add Book” form, when they fill title, author, select status, set pages, pick genres/tags, and click save, then the book appears in their library and a success toast shows.

AC-02: Progress Tracking

Given a book with `total_pages = 300`, when the user sets `current_page = 150`, then `progress_percentage` automatically updates to 50%.

AC-03: Dashboard Stats

Given a user with 5 finished books in 2026 and 2 currently reading books, when they visit the dashboard, then they see “5 finished this year” and “2 currently reading”.

AC-04: Search

Given a library with a book titled “Dune” by Frank Herbert tagged “sci-fi”, when the user types “dune” or “sci-fi” in the search bar, then “Dune” appears in results.

AC-05: Export

Given a user with 10 books, when they click “Export to PDF”, then a PDF file downloads containing all 10 books in a formatted table.

7. Out of Scope (Future Enhancements)

- Social features (friends, activity feed).
 - Book cover image upload / URL.
 - Reading goal setting (e.g., “12 books this year”).
 - Integration with external APIs (Goodreads, OpenLibrary).
 - Reading sessions / timer tracking.
 - Dark mode (can be added later).
 - Mobile native app.
